**Warning-ALL TERMITE COMPANIES ARE NOT THE SAME-not by a long shot.** If you use the below checklist to compare, you simply will not find another company matching this thorough and professional of a process; you will find others taking shortcuts, which can result in your problems returning. If you compare other companies' bids, be certain you are getting **ALL** of the below listed services, expertise, and safeguards. **Ask to see proof and their testimonials of happy clients.**

**Included In Treatment:**

- Comprehensive, most thorough inspection in the industry.
- Precise measurement of your home's exact volume of space, using a measuring wheel and poles so that correct amount of fumigant is used**
- Use Commercial-Grade Tarps.
- Take every precaution to insure that fumigant does not escape or is wasted, including using sand hauled in by truck to level uneven ground and avoid gaps at bottom of tarp; taping each and every TV antenna, light pole, phone wire, cable, etc.**
- Tarps rolled together at least seven times, forming a tight, leakproof seal that even wind cannot blow apart.
- Weigh the fumigant on an industrial scale to properly calculate the correct amount to treat each room of your house.**
- Expert technician on tenting and treatment team personally trained by Chet Rowland.
- Maximum time for fumigant in tent: we us one team to tent and treat so fumigant is blown in as soon as tenting is complete.**
- Keep fumigant in tent for 20 to 24 hours.
- Use a number of powerful industrial fans.**
- Take special care of plants and trees.
- Extra dust/bait treatment in attic**
- Home is odor-free after treatment.
- Complete follow-up inspection.**
- Job begun and completed on schedule or we pay you \$100 per extra day for your inconvenience.
- Renewable, Lifetime Warranty Available**
