

“How Can We Absolutely Guarantee You A Pest Free Home And Keep That Promise, When Most Other Pest Control Companies, Even "Big Names", Have All Kinds Of Sneaky Fine Print And Escape Clauses In Their Contracts, Pile Up Consumer Complaints At The Better Business Bureau, And Simply Fail To Honor Their Promises?”

Yes, the Guarantees on the other side of this page are real, straightforward and have been honored for 28 years, as we've served well over 37,418 Florida customers. Many stay with us for life. 92% of our new business comes from referrals. Just like you probably have. Why? Because, on top of very courteous and reliable service by the most experienced technicians in the industry, my company flat-out delivers on its guaranteed promise of a pest-free home. How can we do that? A big part of the answer is MY UNIQUE 17-STEP PEST CONTROL TREATMENT SYSTEM THAT SIMPLY LEAVES BUG NO PLACE TO HIDE.

Look, a lot of companies spray some gunk around your baseboards and that's about it. Watch any other company's people at work and see if they match up with MY treatment system:

INITIAL INTENSIVE SERVICE

- Step 1. 57-Point Bug & Termite Audit: A complete and thorough inspection, inside and out, top to bottom
- Step 2. Dust or bait attic and/or crawl spaces
- Step 3. Remove switch plates and electrical outlets, then apply appropriate dust/baits, etc.
- Step 4. Drill and treat kick plate holes under cabinets and vanities

INTERIOR TREATMENT

- Step 5. Inject cracks and crevices in kitchen and bathrooms
- Step 6. Treat around ALL doors and windows
- Step 7. Pull back plumbing covers in tubs, showers and under sinks
- Step 8. Treat under and around ALL appliances
- Step 9. Treat around top and bottom of garage or carport
- Step 10. Remove spider webs
- Step 11. Look for any new termite tubes around garage expansion joints

EXTERIOR TREATMENT

- Step 12. Treat ALL eaves and soffits
- Step 13. Remove spider webs and even wasp nests
- Step 14. Treat around ALL doors and windows
- Step 15. Treat around garbage cans, wood piles and under decks
- Step 16. Treat 6-foot "steel curtain defense barrier" around outside perimeter of your home
- Step 17. Check for new termite mud tubes and wings of swarming termites

OUR \$50.00 AND \$100.00 CHALLENGES:

- 1. Have us come and do this 17-Point Inspection with you watching, right after any other pest control company has provided their regular service. If we don't find and point out to you important bug-entry points or breeding grounds left unprotected or untreated, we'll pay you \$100.00
- 2. Watch closely as any other pest control company's technician provides your regular service - if he does all -17 of these things and you will sign an affidavit to that effect, we'll pay you \$50.00.

Even more detailed information about this 17-Point Inspection is available at www.chetspest.com or in a brochure available on request.

QUESTION: "CAN I GET BY WITH A LESS THOROUGH AND CHEAPER SERVICE?"

Maybe. But you'll find our prices are about in the middle of the market, not the cheapest but definitely not the highest, and there are NEVER hidden charges or surprises, or "low ball" quotes

then lots of "up-selling." Our 28 years in business and over 37,418 customers say: our prices are fair. More importantly, the costs of settling for a "bottom-barrel", cheap service that basically just sprays one chemical around your baseboards can be very, very high - from just the annoyance of paying every month and still having bugs to kill yourself, still pulling the can of store-bought bug spray out from under the sink ... to having termites do very serious damage before you know what hit you. Saving a dollar or two and settling for less than our proven, superior service really is no bargain at all. Think about the guaranteed results you really want.
